

Effective magnetic field for bias coil currents along different axes

Axial bias coil y
($I_x = 0\text{A}$, $I_z = 0\text{A}$)

Vertical bias coil z
($I_x = 0\text{A}$, $I_y = 0\text{A}$)

Transport bias coil x
($I_y = 0\text{A}$, $I_z = -2.4\text{A}$)
